

Please use the following APIs in payments process, so it can reflect the purchased executions count in the application page.

1. API 1: Update executions for subscriptions

- **Dev Endpoint:** https://dev.wiiz.it/aiwf/update_execution_subscription
- **Test Endpoint:** https://sandbox.wiiz.it/aiwf/update_execution_subscription
- **Json Payload Example:**

```
{
  "zoho_customer_id": "7816790000000185003",
  "execution_amount": 2000,
  "plan_id": "plan_pro_monthly",
  "payment_datetime": "2026-01-07T14:30:07",
  "payment_id": "PAY_987654321"
}
```

- **Note:** This API updates the column where we track monthly quota executions.
- Payment datetime tracks when the payment was made.

2. API 2: Update executions for addons

- **Dev Endpoint:** https://dev.wiiz.it/aiwf/update_execution_addons
- **Test Endpoint:** https://sandbox.wiiz.it/aiwf/update_execution_addons
- **Json Payload Example:**

```
{
  "zoho_customer_id": "7816790000000185003",
  "addon_executions": 25
}
```

- **Note:** This API updates the column where we track addon quota executions.

3. API 3: User Sign UP

- **Dev Endpoint:** <https://dev.wiiz.it/aiwf/signup>
- **Test Endpoint:** <https://sandbox.wiiz.it/aiwf/signup>
- **Json Payload Example:**

```
{
  "username": "test@gmail.com",
  "password": "test",
  "email": "test@gmail.com",
  "first_name": "Ron",
}
```

```
"last_name": "Rease",  
"plan": "free_trial",  
"otp": ""  
}
```

4. API 4: API To Request OTP

- **Dev Endpoint:** https://dev.wiiz.it/aiwf/generate_otp
- **Test Endpoint:** https://sandbox.wiiz.it/aiwf/generate_otp
- **Json Payload Example:**

```
{  
  "email": "test@gmail.com"  
}
```
